Hi, does any body have a setup of AutoCAD on Ubuntu? . Installed on Ubuntu 18.04 but no idea how to run it. A: Download one of the several available rar files that contains the source ISO. Extract the ZIP file, which is all the files you need, including a folder called MODS\_SMODNAME-VERSION\_SMOD\_BASE\_VERSION with all the files you need to customize the skin. Open up Tobjedit and drag the folder you extracted to it. Press the settings button, and select the.CAD file. It should open in Tobjedit. Select the colors you want (you will have to do this for the logo, the icon, the button, and the crosshair), and save the file. Close Tobjedit, and press Save all. It will save the file on the folder you have opened. Install the mod in the game.
